

Styled Image Ad Creator – Test Plan

1. Project Overview

Project Name: Styled Image Ad Creator (Web)

Modules: Project, Background, Typography, Effects, CTA Button, Ad Preview, Download

Tester: Ozih Uddin Al Fuzayel (SQA)

Test Types: Functional, UI/UX, Cross-Browser, Negative

2. Test Objectives

- Verify functional behavior of all controls.
- Ensure UI/UX consistency.
- Validate behavior across major browsers.
- Identify negative behavior with invalid inputs.

3. Test Scope

In Scope:

- Canvas size, templates, background editor.
- Typography settings.
- Effects.
- CTA button settings.
- Ad preview & download.
- UI/UX checks.
- Cross-browser tests (Chrome, Firefox, Edge).
- Negative tests (invalid input).

Out of Scope:

- Performance testing
- Security testing
- Mobile testing

4. Test Approach

Functional Testing: Verify each control updates preview and output.

UI/UX Testing: Check alignment, responsiveness, colors.

Cross-Browser: Validate consistent rendering.

Negative Testing: Invalid inputs, long text, invalid color formats.

5. Test Environment

Environment: Netlify deployed URL

OS: Windows 10/11

Browsers: Chrome, Firefox, Edge

Test Data: Sample ad texts, valid/invalid hex values.

6. Entry & Exit Criteria

Entry: App accessible, no blockers.

Exit: All test cases executed, no critical defects.

7. Deliverables

- Test Plan
- Test Cases
- Bug Reports
- Execution Report
- Summary Report

8. Risks

- Requirements may be unclear.
- UI changes during testing.

9. Roles

SQA: Execute tests

Developer: Fix issues

Product Owner: Approve results
